

Altrix®

The evolution of temperature management

Altrix® maintains the simplicity of **Medi-Therm III** while delivering meaningful clinical upgrades, faster response, better data, and greater versatility across every department.

PATIENT TEMP. PRECISION

±0.1°C

ADJUSTMENT CYCLE

Every 2.6s

HOSE CIRCUITS

3 independent

OPERATING ROOM

FDA validated

Smart Fluid Management

Three individually monitored water circuits with self-sealing hose ports to eliminate spillage and maximize thermal transfer.

Medi-Therm III: 2 circuits, overall monitoring only

Reach target temperature faster

Altrix can reach water temperature 50% faster, and patient target temperatures 40% faster than Medi-Therm III.

Fill without interrupting therapy

A translucent, removable water reservoir simplifies water level monitoring and filling, helping maintain uninterrupted therapy.

Medi-Therm III: internal not-removable reservoir

Altrix®

One TTM platform. Hospital-Wide

±0.1°C precision with FDA-validated, non-aerosolizing design, built for ED, ICU, OR, and Burn Unit

Medi-Therm III: ±0.5°C precision

See therapy performance at a glance

Real-time trend graphs display patient, target, and water temps, helping clinicians monitor progress more effectively.

Medi-Therm III: no therapy data output

Built-in guidance when you need it

On-screen troubleshooting guides staff through alarms and corrective actions, reducing downtime.

Medi-Therm III: no troubleshooting guidance
